

India is one of the major exporters of guar gum to Europe and other countries across the world. Regularly meeting the quality requirements of these countries is really a problem for exporters. Efrac by its conscious effort to work with guar gum exporters has set up one of the best facilities in India, for the analysis of PCP and dioxins.

Products we are testing

- Guar gum
- Guar gum products

Parameters to be tested

- Penta Chloro Phenol (PCP)
- Dioxins and Furans (PCDD and PCDF)
- Microbiological analysis

Equipments Used

- LC-MS/MS, HRGC-HRMS.

Methods Used

- Dioxins-USEPA 8290 & 1613
- PCP-Internal validated method.

Unique Features

- E-mail acknowledgement of sample receipt
- Customer user ID and password for report viewing
- Consultation on failed samples (level of detection)
- Logistical support
